1. Failing to Showcase Your Home and Make Small Cosmetic Changes

When you are selling your house, you have to really look at it objectively and think about it from the viewpoint of the house hunter. Make minor enhancements to the house and maybe hire a **professional stager** to come and arrange your furniture. Staging is about decorating your house for the buyers' taste, not yours. A great place to start is with the front of the home and the main entryway. **Home staging** is designed to increase the potential selling price and reduce the amount of time the house stays on the market.

2. Setting Too High of a Sale Price
3. Buying What You Want, Not What You Need
4. Overlooking the Extra and Hidden Costs
